

Gator "Grad"-tude

I never truly appreciated the education I received from GVHS until I was thrown into the college world. When being placed in a classroom with students who recently graduated from many different high schools, I was then able to get a better idea of the education I ended up receiving. While other students struggled and complained, I found my classes to be intriguing. GVHS was able to provide me with an environment conducive to learning and creativity. I was blessed to have teachers who cared, and at the same time were passionate about what they taught. My experience at GVHS in my opinion was the strong foundation that one needs when entering college. It allowed me to be confident and approach college with the same excitement and enthusiasm that was instilled in me at GVHS. I also attribute my ability to approach every task with great efficacy to GVHS. The campus was clean, safe, and filled with great classes, clubs, and excellent staff. I can only hope that future graduating students are able to receive the opportunities I did. If so, it will make their college years a lot more enjoyable.
