

Gator "Grad"-tude

I feel strongly about the education GVHS provided me in preparing for my future. I was challenged by my teachers and the curriculum to work hard and achieve the highest grades in order to be successful in life. Mr. Horn was a great math teacher my senior year. As I went through the year with him, he made me realize that I was above average in the math field. Also, Mr. Horn, whether he knew it or not, put the thought in my head that I might one day want to be a math teacher/coach and be as "cool" as he was. Well, here I am today completing my fifth year as a math teacher and head football coach.
