

Creativity

ONE PERSPECTIVE

Think of what you daily see, hear, or read about, along with the ideas they represent, as pieces of a jigsaw puzzle. A creative person takes these pieces, selects some of them, and perceives new, interesting, and useful ways they can fit together.

These perceptions are the essence of some of mankind's greatest achievements, not just in the arts (e.g. novels, paintings, music) but also in the sciences (e.g. physics, medicine, psychology, architecture).
