

GATOR GREEN

Classroom Tips for Conserving Energy

1. **Recycle, Recycle, Recycle!** Make sure to deposit all paper and plastic products in the GG bins! Any tests, homework, or other assignments that are thrown away should be recycled.
2. **Turn off all electrical equipment when not in use!** This includes projectors, computers, and light switches.
3. **Use tools such as turnitin.com!** By submitting assignments electronically, students and teachers can conserve paper.
4. **Make sure to spread the word about energy and resource conservation!** Gator Green meetings are held every Tuesday after school in room 911.
